

ACKNOWLEDGEMENT OF COUNTRY

Calix acknowledges the First Nations people and Traditional Custodians of the land on which we live and work, and recognise their deep, ongoing connection to the land, waters, and community. We pay our respects to their Elders past, present, and emerging, and extend that respect to all First Nations people.

SOCIAL INCLUSION STATEMENT

Calix embraces diversity and inclusion. It is one of our core values. We promote an inclusive and safe space for all and proudly welcome and support people of any race, ability, gender and identity.

SUSTAINABILITY STATEMENT

At Calix, sustainability means meeting our own needs without compromising the ability of future generations to meet their own needs. It is deeply embedded in our purpose: solving global challenges. Because Mars is for quitters.

Important note: This Report has been prepared by Calix Limited. It contains summary information about Calix Limited and its subsidiaries and their activities current as at 27 August 2024. It should be read in its entirety, together with the Forward Looking Statement Disclaimer at the back of this report.

ABOUT CALIX

Calix Limited is an environmental technology company solving urgent global challenges in industrial decarbonisation and sustainability.

Calix's unique patented core platform technology delivers indirect heating of raw materials to enable efficient, precise, flexible and renewably powered mineral processing and capture of unavoidable industrial emissions.

With strong and increasing demand driven by global decarbonisation commitments, Calix is applying its core technology to the cement, steel, alumina, and critical minerals industries, as well as the direct air capture of atmospheric carbon dioxide, and the production of sustainable environmental products.

Leveraging its core platform technology and a global network of partners, Calix is urgently developing multiple businesses that deliver positive global impact. Because there's only one Earth.

Mars is for quitters.

LETTER FROM THE CHAIR

We are pleased to present the Calix Limited (the Company and Calix) Corporate Governance Statement for the 2024 Financial Year. It provides an overview of Calix's corporate governance framework, policies and practices.

Calix is committed to high standards of corporate governance and transparency, with a focus on acting with integrity, mitigating risks, and enhancing our long-term sustainability. This commitment supports the delivery of our strategy, while meeting prevailing best practice governance standards.

The Calix Limited Board of Directors (the Board) is responsible for the overall corporate governance of the Company. The Board recognises the importance of high standards of governance to creating, protecting and enhancing shareholder value. Directors and employees are expected to maintain ethical standards in the conduct of Calix's business activities at all times.

The Board is also responsible for the overall operation and stewardship of Calix, including the Company's strategies and oversight of their execution. Calix integrates environmental, social and governance considerations, including risks and opportunities, into our strategic discussions, business decisions, risk management and governance framework.

An appropriate mix of skills, knowledge and experience is vital to the Board's ability to effectively lead the organisation and support the delivery of its strategic goals. In January 2024, we welcomed two new independent non-executive Directors, Dr Sarah Ryan and Peter Dixon to the Board. These appointments are enhancing the Board's ability to support Calix's strategic growth objectives.

The Board considers that Calix's corporate governance practices have been consistent with the recommendations contained in the fourth edition of the Australian Securities Exchange Corporate Governance Principles and Recommendations throughout the reporting period from 1 July 2023 to 30 June 2024.

This Corporate Governance Statement is current as at 27 August 2024 and has been approved by the Board. For more information on Calix and its corporate governance, please visit our [investor centre](#) on the Company's website.

Peter Turnbull, AM
Non-Executive Chair

The Board recognises the importance of high standards of governance to creating, protecting and enhancing shareholder value.

OUR APPROACH TO CORPORATE GOVERNANCE

Calix is committed to high standards of corporate governance and transparency, with a focus on acting with integrity, mitigating risks, and enhancing our long-term sustainability. This commitment supports the delivery of our strategy, while meeting prevailing best practice governance standards.

The Calix Limited Board of Directors (the Board) is responsible for the overall operation and stewardship of Calix. In performing these responsibilities, the Board acts in a manner designed to create and continue to build sustainable value for shareholders, and in accordance with the duties and obligations imposed on it by the Calix Constitution and by law.

The Board has adopted a charter to formalise and improve transparency regarding the functions and operations of the Board and its relationship with management. It defines the relationship between the Company, its shareholders, and the Board and describes the matters reserved for the Board and those delegated to the Managing Director (MD) & Chief Executive Officer (CEO), including authority for the day-to-day management of Calix. The MD & CEO in turn delegates certain authorities and responsibilities to management but remains accountable to the Board for the Company's performance and for all delegated authority.

Four standing committees – Audit & Risk Management Committee, People, Culture & Nominations Committee, Technology Committee, and Sustainability Committee – have been established by the Board to assist the Board in discharging its responsibilities. Each Committee operates in accordance with its committee charter. The charters govern the operations of the committees, setting out each committee's role and responsibilities, composition, structure and membership requirements.

In accordance with the fourth edition of the Australian Securities Exchange (ASX) Corporate Governance Principles and Recommendations (ASX Principles and Recommendations), Calix's charters and policy documents are reviewed and approved annually.

Calix's compliance with the ASX Principles and Recommendations is outlined within ASX Appendix 4G. Calix's current ASX Appendix 4G has been lodged with the ASX.

This Corporate Governance Statement is part of Calix's 2024 Financial Year reporting suite, which also includes the Calix Limited Annual Report 2024 and Calix Limited Sustainability Report 2024.

Calix's charters, policy documents, annual reports, sustainability reports, and its current ASX Appendix 4G are available in the [investor centre](#) on the Company's website.

Calix Limited Governance Framework

BOARD OF DIRECTORS

Calix has a diverse Board of Directors (the board) committed to enhancing and protecting shareholders' interests. It is comprised of five independent non-executive directors, the Managing Director (MD) & Chief Executive Officer (CEO), and Executive Director, Chief Scientist & Co-founder. A profile of each director is available in the [investor centre](#) on Calix's website.

Peter Turnbull, AM
Non-Executive Chair

Alison Deans
Non-Executive Director

Peter Dixon
Non-Executive Director

Helen Fisher
Non-Executive Director

Roles and responsibilities of the Board

The Board is responsible for the overall governance of Calix. The role of the Board is to set Calix's strategic direction for the creation, maintenance and enhancement of long-term sustainable value, to guide and monitor the management of the Company and its implementation of the strategy, and to oversee good governance practice.

The Board aims to protect and enhance the interests of Calix's shareholders, while taking into account the interests of other stakeholders, including employees and contractors, customers and partners, governments and regulators, and the wider community.

In performing its role, the Board is committed to a high standard of corporate governance and to fostering a culture of compliance which values ethical, lawful and responsible behaviour.

The Board has a charter which clearly sets out its role and responsibilities and describes those matters expressly reserved for the Board's determination. The Board Charter is available in the [investor centre](#) on Calix's website.

The MD & CEO has responsibility for the implementation of Calix's strategic objectives, operating within the risk appetite set by the Board, and for the day-to-day management of Calix. The MD & CEO is supported in this function by the Calix Executive Team. Profiles of the members of the Executive Team are available in the [investor centre](#) on Calix's website.

Summary of the Board's key responsibilities

Area	Disclosure
Strategy	Define Calix's purpose, set the strategic direction, and approve the strategy and Key Performance Indicators developed by management. Monitor and assess strategy implementation by management. Approve and monitor capital management and material transactions.
Risk management and reporting	Approve the risk management framework and set the risk appetite within which the Board expects the MD & CEO and the Executive Team to operate. Ratify Calix's systems of internal compliance and control. Approve and monitor financial and other reporting, including disclosures of material information.
Leadership selection	Appoint and remove the MD & CEO, and ratify the appointment and removal of the MD & CEO's direct reports.
Succession and remuneration	Approve Calix's remuneration policies and framework and monitor their implementation. Establish and monitor executive succession planning.
Performance monitoring	Undertake an annual evaluation of the performance of the Board and approve criteria for assessing and monitoring the performance of senior executives.
Corporate governance	Review, ratify, monitor and evaluate the effectiveness of Calix's systems of governance, risk management and internal compliance and control, legal compliance, Code of Conduct and other corporate governance policies and practices.
Board committees	Establish committees of the Board, as may be appropriate, to assist the Board to fulfil its corporate governance and oversight responsibilities through monitoring and advice. Adopt charters setting out the membership, responsibilities and reporting obligations of each board committee, and evaluate their performance.

Dr Mark Sceats
Chief Scientist, Executive
Director & Co-founder

Structure and composition of the Board

The Calix Constitution provides that the number of directors must at any time be no more than ten and no less than three. The Board should comprise a majority of people who are independent directors and people with a mix of skills and diversity of backgrounds to enable the Board to discharge its duties effectively. The Chair of the Board (Chair) should be independent and should not hold the role of MD or CEO.

Calix is committed to ensuring the composition of the Board continues to include directors who bring an appropriate mix of skills, experience, knowledge, expertise and diversity, including gender diversity, required to discharge the Board's duties. Details of the directors, including their qualifications and date of appointment, are set out in the table below. Detailed biographies of the directors are available in the [investor centre](#) on the Company's website.

The Board is of the view that the tenure profile, represented by the length of service of each of its directors on the Board, is appropriately balanced such that board succession and renewal planning is managed over the medium to longer term.

The current directors possess an appropriate mix of skills, experience, knowledge, expertise and diversity to enable the Board to discharge its responsibilities, including overseeing the delivery of the Company's strategic priorities.

Board tenure and qualifications

Director	Independent	Date of appointment	Period of office	Last election	Qualifications
Peter Turnbull, AM	Yes	12 February 2009	Full year	FY22 AGM	BCom, LLB, FGIA (Life), FCG, FAICD

Phil Hodgson	10	10	—	—	2	2	—	—	—	—
Mark Sceats	10	10	—	—	2	2	—	—	—	—

Board skills matrix

The board skills matrix setting out the mix of skills of the Board, including strategy and portfolio skills, industry and commercial skills, and management, board and personal experience is being redeveloped in the quarter ending 30 December 2024. The redevelopment follows a significant period of renewal of the Board in the past 18 months, and the upcoming planned retirement of the Chair in September 2024. A refreshed board skills matrix will be included in the Calix Corporate Governance Statement in FY25. Further information on board renewal follows later in this report. Each directors' qualifications are included in the Board tenure and qualifications table in this report, and detailed biographies of the directors are available in the [investor centre](#) on the Company's website.

Role of the Chair

The Chair is responsible for leading the Board in the performance of its duties and is elected from the independent non-executive directors. The Chair should not hold the role of MD or CEO.

Director independence

Calix recognises that independent directors have an important role in assuring shareholders that the Board is able to act in the best interests of Calix and independently of management.

An independent director is a non-executive director who is free of any interest, position, association or relationship that might influence, or reasonably be perceived to influence, in a material respect, his or her capacity to bring an independent judgement to bear on issues before the Board and to act in the best interests of the entity and its security holders generally.

The Board will regularly review the independence of each director in light of interests disclosed and will disclose any change to the Australian Securities Exchange (ASX), as required by the ASX Listing Rules. The matters to be considered include the factors set out in the fourth edition of the ASX Corporate Governance Principles and Recommendations (ASX Principles and Recommendations) as well as other facts, information and circumstances that the Board considers relevant.

The Board has determined that each director other than the MD and Executive Director were independent throughout the reporting period. The length of service of each director is disclosed earlier in this report, in the table titled, Board tenure and qualifications.

The Board tested the independence of the Non-Executive Chair, without his participation in the process, given he has served on the Board for more than 15 years. The Board concluded unanimously that he is an independent non-executive chair. The evidence considered by the Board, includes interactions over time between the MD and the Chair, including differing views on various topics, the conduct of board meetings, and board committee work undertaken by the Chair.

Conflicts of interest

Directors are not involved in decisions where they have, or could be perceived to have, a conflict of interest or a material personal interest. To help directors manage any such conflicts the Board has developed processes with the aim of ensuring that consideration of matters by the Board and any board committees is undertaken free from any actual influence or appearance of influence from persons with conflicts of interest. The processes also aim to ensure that the disclosure of Calix's confidential information is subject to appropriate corporate governance controls.

Independent advice

The Board may seek independent professional advice at the expense of Calix whenever the Board judges such advice to be necessary for its members to discharge their responsibilities as directors. Individual directors may also seek independent professional advice at the expense of Calix where the Chair agrees (in advance) that separate representation is appropriate. All professional advisors must be suitably qualified and experienced and must be acceptable to Calix. No individual directors exercised this right during the year.

Company Secretary

The Company Secretary is appointed and can be removed by the Board. The role supports the effectiveness of the Board and its committees, including in relation to governance matters, policy and procedures, preparation and dispatch of papers, minute taking, and induction and professional development of directors. All directors have access to the services and advice of the Company Secretary. The Company Secretary is accountable directly to the Board, through the Chair, on all matters to do with the proper functioning of the Board and board committees.

Board committees

The Board has established committees as part of its governance framework to assist in the execution of its duties and to ensure important and complex issues are given the detailed consideration they require. The committees are directly relevant to Calix's business, follow the ASX Principles and Recommendations, and support the Board in its commitment to a high standard of corporate governance.

The committees of the Board are:

- Audit & risk management
- Technology
- Sustainability
- People, Culture & Nominations Committee

Each Board committee has an independent director as its chair and comprises members who are independent directors. Each committee has its own charter approved by the Board, under which the Board delegates authority, and each committee is required to report the outcomes of its deliberations to the Board, so the Board is fully informed. The Board undertakes a periodic performance evaluation of each committee, comparing the performance of the committee with its charter, while also establishing the goals and objectives of the committee for the upcoming year.

Committee membership and a summary of each committee's responsibilities follows. A summary of board committee meeting attendance for FY24 is available on page 8 of the Corporate Governance Statement. The committees' charters are available from the [investor centre](#) on the Calix website.

RESPONSIBILITIES INCLUDE

The Audit & Risk Management Committee assists the Board in fulfilling its corporate governance and oversight responsibilities, including: Calix's external audit plans; financial reports; financial reporting process; risk assurance activities; and compliance and risk management functions.

The Technology Committee assists the Board by monitoring and advising on: Calix's Technology Roadmap and/or business plans; external technical reviews; the technical risk in Calix's activities; intellectual property management and strategy; and publication and disclosure of scientific or technical information.

People, Culture & Nominations Committee assists the Board by monitoring and advising on: Calix's key people and organisational culture strategies, including: recruitment, retention and termination policies, and succession planning; board and board committee appointments, inductions, professional development and succession planning; Calix's remuneration policy, including as it applies to directors; non-executive directors, executive directors and senior executives' remuneration packages and performance reviews; and Calix's performance against its Diversity Policy, including any inappropriate bias in remuneration.

The Sustainability Committee assists the Board in its oversight of the development, execution and evaluation of Calix's strategies, policies and initiatives related to sustainability and the United Nations Sustainable Development Goals, in conjunction with other board committees.

BOARD PERFORMANCE & SUCCESSION PLANNING

Director appointment and election

Prior to appointing a director, a rigorous process of evaluation and due diligence is undertaken to ensure the suitability and capacity of the candidate to discharge their duties as a member of the Calix Limited Board of Directors (the Board). This evaluation includes: the individual's skills and experience as well as their expected contribution to the collective skills and experience of the Board; current and prior directorships and/or executive roles; independence; and any other matters that could adversely affect their ability to effectively discharge their duties as a member of the Board. Additionally, appropriate background checks are performed in relation to the appointment of new directors, including the person's criminal record, bankruptcy history, character, experience and education. Calix provides shareholders with all material information in its possession relevant to a decision on whether or not to elect or re-elect a director.

A director appointed to the Board must stand for election at the next Annual General Meeting (AGM) of the Company. Directors (excluding the Managing Director and Executive Director) must stand for re-election at the third AGM following their election. There is no limit on director tenure. A recommendation that the Board supports an existing director standing for election or re-election is not automatic.

Director induction and development

Following their appointment, directors are supported through a formal induction program to familiarise them with Calix's business. This typically involves a combination of meetings with the Calix Executive Team, other senior management, site visits and briefings on specific issues. This process continues throughout each director's tenure, and on an ongoing basis, directors are provided with papers, presentations and briefings on matters that may affect the business or operations of Calix. In the 2024 Financial Year, the Board visited the Calix Technology Centre in Bacchus Marsh, Victoria.

All directors are expected to maintain the skills required to discharge their obligation to Calix, including undertaking continuing education and relevant training. Directors periodically undertake personal development to maintain the skills and knowledge required to perform their roles effectively.

Board performance evaluation

The Chair of the Board (the Chair) undertakes an annual evaluation of the performance of the Board, each board committee and individual directors, comparing their performance with the requirements set out in the Board Charter, relevant board committee charters and the reasonable expectations of individual directors. A non-executive director from the Board conducts an annual evaluation of the performance of the Chair, including canvassing the views of the other directors.

Following the annual performance reviews, the results and recommendations from the evaluations of the Board and committees are reported to the full board for further consideration and action, where required. Additionally, the Chair establishes the goals and objectives of the Board for the upcoming year and amends the Board Charter and board committee charters if amendments are considered necessary or desirable. The most recent performance reviews of the Board, including the Chair, were conducted in June 2024.

Board renewal

The Board takes a proactive approach to board succession and renewal to ensure the composition of the Board is appropriate at all times to support the delivery of Calix's strategic goals.

On 19 December 2023, Calix announced the appointments of Dr Sarah Ryan and Peter Dixon to the Calix Board as independent non-executive directors. Effective from 1 January 2024, the appointments represented an important step in Calix's board renewal and followed the appointment of Alison Deans on 1 March 2023. A further step is the planned retirement of Peter Turnbull in September 2024, with Ms Deans to become the new chair following Mr Turnbull's retirement.

Calix sincerely thanks Mr Turnbull for his many years of dedicated service as a Director and Chair of the Board. His commitment to the highest standards of governance, creation of long-term and sustainable value for shareholders, and proactive board renewal leave the Company well positioned to execute its growth strategies and deliver positive global impact.

The Board renewal outlined above will result in the Calix Board being comprised of four highly experienced non-executives and two executive directors, further enhancing the governance of the Company.

The Board takes a proactive approach to board succession and renewal, ensuring the composition of the Board is appropriate to support Calix's strategic goals.

REMUNERATION AND EVALUATION OF SENIOR EXECUTIVES

Delegated authority

Calix's Managing Director (MD) & Chief Executive Officer (CEO) is responsible for the day-to-day management of Calix under delegated authority from the Calix Limited Board of Directors (the Board), in addition to implementing the policies and strategy set by the Board. The role of management is to support the MD & CEO, leading the Company's operations and financial business, in accordance with the delegated authority of the Board. The delegated authority includes responsibility for developing business plans, budgets and strategies for Calix for consideration by the Board. To the extent these are approved by the Board, management is then responsible for implementing these plans and budgets. Where proposed transactions, commitments or arrangements exceed the parameters set by the Board, management refers such matters to the Board for its consideration and approval. Through delegated authority from the Board, management is also responsible for identifying and managing operational and other risks and, where those risks could have a material impact on Calix's businesses, formulating strategies for managing these risks for consideration by the Board.

Senior executive remuneration

The objectives of Calix's remuneration policies are to align the interests of Calix's directors and employees with shareholders' interests, while ensuring remuneration structures are fair and competitive. The policies, including an Employee Incentive Scheme, seek to balance incentives to achieve annual short-term goals with incentives to create and execute opportunities that build long-term shareholder value.

The People, Culture & Nominations Committee established by the Board regularly reviews and makes recommendations to the Board regarding appropriate remuneration policies, including retirement benefits and termination payments (if any), for senior executives and ensures these policies enable Calix to attract and retain valued employees, motivates senior executives to pursue the long term growth and success of the Company, demonstrates a clear relationship between performance and remuneration, and has regard to prevailing market conditions.

The directors' policies for determining the nature and amount of remuneration for key management personnel are outlined in the Company's annual Remuneration Report. The 2024 Remuneration Report is included in the Calix Limited Annual Report 2024, which can be accessed in the [investor centre](#) on the Company's website.

Senior executive performance evaluation

Calix has written agreements setting out the terms of the appointments for each senior executive. The Board approves the criteria for assessing the performance of senior executives and monitoring and evaluating their performance annually against agreed performance objectives and other relevant factors.

The People, Culture & Nominations Committee develops and implements a plan for identifying, assessing and enhancing competencies of senior executives and executive directors. The committee reviews succession plans of senior executives on a regular basis to maintain an appropriate balance of skills, experience and expertise in the management of Calix and provides advice to the Board accordingly.

Executive Team performance evaluations were conducted for FY24 in accordance with this process. Details of the evaluation process and the linkages between the result of performance evaluations and remuneration are disclosed in the Remuneration Report included in the Calix Limited Annual Report 2024, which can be accessed in the [investor centre](#) on the Company's website.

The objectives of Calix's remuneration policies are to align the interests of Calix's directors and employees with shareholders' interests, while ensuring remuneration structures are fair and competitive.

LAWFUL, ETHICAL & RESPONSIBLE BUSINESS

Calix operates under a [Code of Conduct](#), which is a meaningful statement of the Company's values and represents our commitment to uphold the highest standards of lawful, ethical and responsible business practices. The Code of Conduct is supported by a suite of governance policies, which together, seek to adopt leading governance standards and practice for the Company, its directors and employees of Calix.

Code of Conduct

Calix is committed to maintaining ethical standards in the conduct of its business activities. The [Code of Conduct](#) clearly states the standards of responsibility and ethical conduct expected of the Company's directors and employees. It applies to all directors and employees of Calix, and where relevant and to the extent possible, consultants, secondees and contractors of Calix. The Code of Conduct also outlines the procedure for reporting any breaches of the Code of Conduct and the potential disciplinary action Calix may take in respect of any breaches. Material breaches of the Code of Conduct by a director or senior executive would be reported to the Board, in addition to any material breaches that would call into question the culture of the organisation. Familiarisation with the Company's Code of Conduct is incorporated into the induction program for new directors and employees of the Company. Calix's [Code of Conduct](#) is available in the [investor centre](#) on its website.

Calix's values

Calix's values provide the foundation of the Company's culture, guide our thinking and behaviours, helping to propel us towards our vision to become a leading global innovator of industrial solutions for the environment.

SENSE OF URGENCY

Sense of urgency means we embrace the rate of change necessary to make a sustainable future a reality.

POSITIVE IMPACT

Positive impact is what drives us to work every day. We are driven to use our unique skills to create truly sustainable industrial practices.

INNOVATION

Innovation reflects our ability to think from first principles, to challenge each other, and adapt quickly to new opportunities.

RESOLUTE

Resolute means we are a purpose-driven company and determined to make a positive difference for the long-term.

INCLUSIVE

Fostering a diverse and inclusive culture is not just a moral imperative; it provides the foundation for driving innovation and business success. Diversity is a key focus for our company.

TEAMWORK

At the foundation of our spirit is teamwork. We are a down-to-earth, caring, honest, innovative and dedicated team of people working together to solve global challenges.

Governance policies

The Board considers the governance policies and practices adopted by Calix during the reporting period ended 30 June 2024 follow the recommendations contained in the fourth edition of the Australian Securities Exchange (ASX) Corporate Governance Principles and Recommendations (ASX Principles and Recommendations).

Calix's externally available corporate governance policies are listed below. The investor centre on Calix's website provides access to each of these policies. Anti-Corruption and Anti-Bribery Policy

- Continuous Disclosure Policy
- Diversity Policy
- Drug, Alcohol and Smoking Policy
- Environment Policy
- Minimum Shareholding Policy for Directors
- Online Privacy Policy
- Parental Leave Policy
- Privacy Policy
- Product Quality Policy
- Safety, Health and Environmental Policy
- Security Trading Policy
- Shareholder Communications Policy
- Risk Management Policy
- Whistleblower Protection Policy
- Workplace Respect Policy

Diversity and inclusion

As one of Calix's core values, diversity and inclusion is foundational to our culture. The Company believes that fostering a diverse and inclusive culture is both a moral imperative and the foundation for driving innovation and business success.

The Company's [Diversity Policy](#) supports Calix's commitment to its values and [Code of Conduct](#), as well as complying with the ASX Principles and Recommendations. Furthermore, the policy highlights the Company's commitment to providing a safe and inclusive place of work for its employees, promoting equal opportunity and inclusion for all employees, regardless of gender, identity, caring responsibilities, marital status, religion, race, ethnicity, language, sexual orientation, ability or age. The policy explicitly acknowledges that organisational strength and problem solving is enhanced when the Company makes decisions with reference to a broader range of ideas, values, and experiences.

In FY21, Calix's Sustainability Team adopted the United Nations Global Compact's (UNGC) Sustainability Development Goal Ambition Benchmark of achieving gender balance at all levels of management by 2030. In FY23, the Company expanded its ambition to apply across all levels of the organisation. The Calix Limited Sustainability Report 2024, which is available in the [investor centre](#) on the Company's website, provides a progress report against this ambition, including current data on the gender identity of all employees, management and the board, in addition to highlighting key initiatives planned for FY25 to drive progress towards achieving our ambition.

Initiatives to build a strong pipeline of diverse candidates, development and retention of diverse talent, and an inclusive culture are strategic imperatives to benefit Calix's business, employees and the planet.

Human rights, modern slavery and child labour

Calix respects human rights as defined by the United Nations Guiding Principles on Business and Human Rights and has implemented the Principles in our operational policies and procedures. Furthermore, as a participant of the UNGC since 2020, Calix has reported our progress against the UNGC's Ten Principles, which include human rights and labour, through an annual Communication on Progress, including in 2024.

Calix supports and respects the rights of all humans and upholds ethical and fair labour practices. As such, Calix supports the elimination of all forms of forced and compulsory labour and the effective abolition of child labour, modern slavery, and human trafficking. Calix proactively ensures that our innovation and business practices protect and respect fundamental human and labour rights, building on policies to help ensure that human rights are strictly upheld throughout our supply chain and operations.

Anti-corruption and anti-bribery

Calix is committed to conducting its business and activities with integrity. To assist in the achievement of this objective, Calix will not engage in corrupt business practices, will implement measures to prevent bribery and corruption by any director, employee, contractor or other party representing Calix, and will, at a minimum, comply with all applicable laws, regulations and standards.

In FY24, Calix received zero reports of bribery or corruption and made no political donations, in accordance with our [Code of Conduct](#) and [Anti-Corruption and Anti-Bribery Policy](#).

Security trading

Calix's [Security Trading Policy](#) summarises the law relating to insider trading and sets out Calix's trading policy, including restrictions on buying and selling securities of the Company. Securities include shares, options, rights to subscribe for shares in the Company, and any other financial products of Calix that can be traded on a financial market. Under the policy, certain people are identified as designated persons and are required to comply with the policy, including directors, all employees of the Company and contractors. The [Security Trading Policy](#) is an important tool in managing the risks associated with dealings in securities. It can be accessed via Calix's [investor centre](#) on its website.

Whistleblower protection

Calix's [Whistleblower Protection Policy](#) is underpinned by a strong commitment to building a culture that reflects sound governance and promotes ethical behaviour in the detection and management of illegal, fraudulent, corrupt, dishonest or improper conduct, including but not limited to harassment, discrimination, victimisation or bullying. The policy provides protection to whistleblowers by establishing a mechanism for concerns to be raised on a confidential basis without fear of reprisal.

The [Whistleblower Protection Policy](#) applies to any individual who is either a current or former officer and director, employee, contractor, supplier, unpaid worker, or relative, dependent or spouse of any officer, employee, contractor and supplier, collectively referred to in this policy as employees and stakeholders. Whistleblowers can raise concerns with Calix's Company Secretary, the Chair of the Audit & Risk Management Committee, or a person authorised by Calix to receive disclosures that may qualify for protection. Employees and other stakeholders can also raise concerns via a dedicated email address circulated to employees and other stakeholders. They can choose to remain anonymous by making an anonymous phone call or sending an email from an anonymous email address. Any matter reported will be investigated and addressed promptly and appropriately, in line with the treatment and protections outlined in the policy. Calix educates its directors and employees on their rights and obligations under this policy.

The Company is committed to fostering a culture of corporate compliance, ethical behaviour, integrity, respect and good corporate governance. Calix's [Whistleblower Protection Policy](#) is available in the [investor centre](#) on its website.

Fostering a diverse and inclusive culture is both a moral imperative and the foundation for driving innovation and business success.

RISK MANAGEMENT AND ASSURANCE

A robust risk management framework helps to enable Calix to identify, assess, monitor and appropriately manage risks. The approach helps Calix foster and maintain a strong risk culture that promotes risk awareness and informed decision-making across the Company's activities.

Risk management oversight

Calix considers ongoing risk management central to achieving its objectives. As such, Calix is committed to ensuring that risk management practices are embedded in all business processes and operations to drive consistent, effective and accountable action, decision-making and management practice.

The Company's [Board Charter](#) clearly defines the responsibility and authority of the Company's Board of Directors (the Board) to oversee and manage the Company's risk management program, while conferring responsibility and authority on the Company's senior management to develop and maintain the risk management program in light of the day-to-day needs of the Company. Regular communication and review of risk management practices provides the Company with important checks and balances to ensure the efficacy of its risk management program.

The Audit & Risk Management Committee (ARMC) of the Board was established to assist the Board in fulfilling its corporate governance and oversight responsibilities, including Calix's risk management systems (financial and non-financial) and internal control structure. The ARMC reviews Calix's risk management framework annually to assess whether it is sound and operating in accordance with the nature and extent of the acceptable levels of risk determined by the Board.

It reports the results of those assessments to the Board. Additionally, the ARMC reviews and makes recommendations to the Board regarding the adequacy of Calix's processes for managing risk, any incident involving fraud or other failure of Calix's internal controls, and the insurable risks associated with the business.

The Company's [Risk Management Policy](#) outlines the program implemented by the Company to ensure appropriate risk management within its systems and culture. The Company's risk management program comprises a series of processes, structures and guidelines that assist the Company to identify, assess, monitor and manage its business risk, including any material changes to its risk profile, consistent with the Australian and New Zealand Standard of Risk Management, AS/NZS4360. Calix's [Risk Management Policy](#) is available in the [investor centre](#) on the Company's website.

Calix's risk management framework is depicted in the diagram below. It sets out a high-level description of how risk governance operates at Calix, together with key responsibilities of the Board, Executive Team, internal audit and the lines of business. It incorporates the three "lines of defence" for how risk is managed. The Board reviewed the Company's risk management framework in FY24 and satisfied itself that the framework continues to be sound.

Calix Limited Risk Framework

Risk summary

Calix identifies, assesses, monitors and manages material financial and non-financial risks associated with its business activities, such as economic, environmental and social sustainability risks, as well as operational, financial and strategic risks. This includes technological developments and actions by competitors.

In accordance with the fourth edition of the Australian Securities Exchange (ASX) Corporate Governance Principles and Recommendations, Calix's key strategic economic, environmental and social sustainability risks and how these risks are mitigated is set out below. These risks, in addition to Calix's operational, financial and strategic risks, may have a material adverse effect on the Company's strategy and/or financial position and/or future performance of the Company.

It is not possible to identify every risk that could affect the business and the actions taken to mitigate these risks cannot provide absolute assurance that a risk will not materialise. The mitigation actions outlined below are not exhaustive and many company-wide controls, such as Calix's Code of Conduct and company policies, help to provide additional support in the management of risks. Over time, the financial and non-financial risks associated with Calix's activities will evolve.

Risk	Description	Mitigation
Principal economic risks		
Geopolitical	Calix is a global company and therefore subject to the risks associated with doing business internationally. Escalating geopolitical and global trade tensions can have potentially significant, long-term implications that could inhibit international trade, weigh on business confidence, and constrain global investment. This could then have material adverse effects on Calix's business and financial position, in addition to adversely affecting Calix's supply chain leading to increased costs or a reduced choice of supply, impacting our ability to execute our plans. Examples of escalating geopolitical and global trade tensions include current conflicts extending beyond their borders, new conflicts arising or key countries becoming more inward looking, nationalistic and isolated.	While the international politics that influence geopolitical risk are and will remain outside Calix's control, the Company closely monitors political and market conditions. Strong engagement with governments, experts and regulators improves monitoring of the risks. The Company is focused on maintaining strong relationships with its customers, partners and suppliers in key markets. The diverse applications of Calix's core platform technology into multiple markets provides further mitigation from geopolitical risks.
Government policy	Unfavourable changes or volatility in government policy in areas such as industry, critical minerals, manufacturing and climate, as well environmental regulations or the ability to secure governmental approval/permitting to construct facilities in a timely manner could have an adverse impact on Calix, and its subsidiaries' abilities to achieve their plans and Calix's financial performance.	Calix is deploying a range of integrated activities to influence governments, industry and other stakeholders to help create favourable market conditions, including favourable public policy settings and demand for Calix's solutions to mitigate this risk. Additionally, proactive engagement with governments and regulators ensures any potential adverse impacts from changes to government policy or regulations are monitored, understood and where possible, mitigated.
Competitive technology	Calix's technology competes against alternative technologies. There is no guarantee that the Calix technology will not be superseded by superior technologies, or will achieve the growth, margins and competitive position that constitutes a valuable, growing business, and there is no guarantee that Calix will attract royalty revenues from new customers.	Calix closely monitors technological advancements – especially those of a competing nature – and invests in Research and Development to keep ahead of, or pace with competing technology. Calix continues to protect its IP by safeguarding with patents. Strategic partnerships also provide access to, and collaboration on, the development of cutting-edge technologies. Calix also continues to diversify its technologies to reduce reliance on specific technologies, market, need or challenge. Calix invests in training and development of staff, aims to hire leading talent, and focuses on developing a culture that fosters agility and adaptability to support technology development.
Market development and expansion	There are aspects of the Calix technology that represent additional features or a new customer value proposition from a novel application of its technology or materials produced by the technology. The Calix application may take some time for customers to understand, and therefore there is a risk that take-up will take longer and involve more cost and effort to bring to market than planned.	Calix develops resources to assist with educating customers, including developing videos and whitepapers, conference papers and presentations, media articles and other content that details the technology's capabilities and benefits. Calix also seeks to partner with industry experts, influencers and thought leaders to help promote awareness and understanding of its technology and benefits.

RISK MANAGEMENT AND ASSURANCE

Risk	Description	Mitigation
Development and scale up	Whilst Calix's calciner has been running with minimal maintenance or operating issues for over 10 years, its robustness as a process has not been demonstrated over decades, which could impact more rapid acceptance of the technology into established industries. Some applications have not been tested beyond pilot scale and may not work in a way that is efficient and robust enough to be of commercial interest to the relevant industry.	Calix is developing technology roadmaps for each of the applications of its core platform technology. These roadmaps identify a comprehensive testing and development program for scale up and they identify the specific design components and actions required to mitigate development and scale up risks.
Regulatory	Calix's operations require adherence to multiple safety, health, environmental, employment and privacy standards at national, state, and county / shire / local levels, and across multiple jurisdictions where Calix will likely operate, or may choose to operate. There is a risk that Calix may now, or in the future, be in breach of such standards, warranting correction, or involving financial penalties, or possibly other more serious business impacts.	Calix is developing a framework for compliance that outlines the policies, procedures and responsibilities for meeting the various regulatory requirements that we have across the markets within which we operate. The Group continues to build its internal capability to manage this risk and develops a support network of external experts to assist. Certain aspects of these regulatory requirements are subject to annual external audit and others are addressed by an internal audit or review process. Additional systems and processes will be developed as the Group continues to scale internationally.
Ability to attract and retain key people	Calix currently employs several key management and scientific personnel. The success of Calix's project's will be dependent upon a number of highly qualified and experienced personnel being attracted to Calix's projects. Calix's future will be dependent upon the continued performance, efforts, abilities and expertise of its key personnel. While there are plans to put in place long-term or evergreen employment contracts, there can be no assurance that Calix will be able to retain personnel or attract suitably qualified personnel in the future, if required. The inability to attract and retain the necessary technical and managerial personnel could have a material and adverse effect upon Calix's operations and financial results.	Calix's core purpose and business focus, to solve global challenges, serves as an attractive mission for current employees and people that we seek to recruit. In addition to retaining this as a core purpose for the business, the Company seeks to provide a working environment that supports and fosters a culture that is attractive to its people. It seeks to offer competitive remuneration policies; the ability for its people to build ownership stakes in the Company and regularly conducts surveys of its teams to measure engagement levels to capture feedback and opportunities for improvement.
Intellectual property	Calix relies heavily on its technologies and know-how and there can be no assurance that competitors or other parties will not seek to imitate or develop technology and know-how that competes with Calix or supersedes Calix's technology. The unauthorised use or disclosure of its intellectual property may have an adverse effect on the operating, marketing and financial performance of Calix which could erode Calix's competitive advantage. Calix cannot be certain that others will not independently develop the same or similar technologies on their own or gain access to trade secrets or disclose such technology, or that Calix will be able to meaningfully protect its trade secrets and unpatented know-how and keep them secret. There is an inherent risk with any licensed technology that the licence may be terminated in accordance with its terms or the patent invalidated by a third party.	Calix maintains registers of its IP assets, patents, trademarks, copyrights, and trade secrets. Where appropriate, it acquires specific legal protection for its IP by registering patents, trademarks or copyrights in specific jurisdictions and territories. At the time of this report, Calix has 29 registered patent families. It also seeks to secure and maintain confidentiality agreements for its people and with 3rd parties that it engages with or to whom it discloses its IP. The Company seeks to educate employees on the importance of its IP and enforces policies on IP usage and the maintenance of confidentiality. It further undertakes specific technical measures to limit or control access to digital assets.
Energy cost	Calix requires a significant amount of energy as a direct input cost for the Calix process to be run on a commercial scale. Energy is used for heating the Calix plant and for additional processes for particular applications.	To mitigate high energy costs, the Calix technology is being developed to be energy-efficient and to be optimised as a process to reduce or minimise energy consumption. Customers of its electric technology can use renewable energy sources such as solar or wind power, and can look to contract for power purchase agreements for stable pricing. It also has the flexibility to operate in a turned down mode to reduce its energy requirements during times of peak energy prices.

Risk	Description	Mitigation
Force majeure events	Events may occur that could impact upon Calix and the value of its business. These events include but are not limited to acts of terrorism, an outbreak of international hostilities, fires, floods, earthquakes, labour strikes, civil wars, natural disasters, outbreaks of disease or other natural or man-made events or occurrences that can have an adverse effect on the demand for Calix's technology and products and its ability to conduct business. Calix only has a limited ability to insure against some of these risks.	Within certain operations of its business, the Company has developed continuity and disaster recovery plans. It also maintains sufficient quantities of stock on hand to mitigate extended disruption in supply chains such that production and delivery of product to customer can be maintained.
Economic downturn	Adverse global or country specific economic conditions may potentially have an adverse effect on Calix's revenue. Any significant downturns in investment in research and development and/or commercialisation may result in a reduction in research and development activity and/or demand for Calix's solutions, potentially resulting in a slowing down or failure to deliver the Company's plans and financial performance.	While global or country specific economic conditions are and will remain outside Calix's control, the Company closely monitors economic conditions. The diverse applications of Calix's core platform technology into multiple markets and geographies can help to mitigate the effects of an economic downturn. Additionally, Calix's strong balance sheet and commercial models provide the Company with flexibility to pursue a diverse capital strategy for investment across its lines of business.
Foreign exchange	Calix is exposed to movements in exchange rates, due to a portion of its revenues and costs being sourced globally. As Calix expands internationally, a greater foreign exchange risk is foreseen.	If, and when, the Board considers it appropriate, financial instruments can be used to manage foreign exchange risk for the Company.
Capital requirements	Calix may be exposed to potential changes in its ability to access funding in the future, whether through regulatory change, failure in grant funding, cost overruns, or failure to generate and grow revenues, which may impact the ability of the business to carry out some or all of its current activities.	Integrated activities to influence governments, industry, investors and other stakeholders help to create favourable market conditions, including favourable public policy settings and demand for Calix's solutions. These activities also provide the information necessary to monitor this risk. High standards of corporate governance and reporting provide transparency, as well as accurate and timely information to the Company. Additionally, Calix's strong balance sheet and commercial models provide the Company with flexibility to pursue the right capital strategy for each investment opportunity across its lines of business.
Principal environmental risks		
Climate change	Calix recognises the risks and opportunities climate change presents for the planet, society, industry and its business. These include transitional risks and opportunities associated with the transition to a low-carbon economy, as well as physical risks such as disruption and damage to business operations, assets and supply chains and/or broader impacts such as environmental stress and water security.	To further understand the material risks and resilience of Calix's strategy and business model, the Company will conduct a climate-related scenario analysis in FY25. This exercise will provide Calix with additional, robust insights into a range of plausible future states for consideration against the Company's strategic areas of focus, investment decisions and planning. The outputs of the analysis will also inform the development of Calix's climate transition plan. Our climate transition plan will communicate the Company's strategy as the global economy moves towards net zero, including a roadmap to achieving Calix's emissions reduction goals. The Company will share the outcomes of its climate assessments and transition planning in its FY25 reporting suite.

RISK MANAGEMENT AND ASSURANCE

Risk	Description	Mitigation
Principal social risks		
Safety	Research and development of Calix's core platform technology, in addition to the operation and management of Calix's solutions at its sites or its customers and partners' sites carries inherent safety risks, including illness, injury and death. Major hazards include handling and testing of hazardous materials. Failing to effectively manage this risk could result in a catastrophic event or other long-term damage. While not considered major hazards, other significant risks at Calix's sites include falling objects and falls from height.	The health and safety of Calix's employees, contractors, visitors and anyone who could be affected by the conduct of its business is the Company's primary operational focus. Building a culture of health and safety first is core to achieving the Key Performance Indicators set by the Board as part of the Company's Safety, Health, Environment and Quality Action Plan, which are the first performance Gateway for the Company's Employee Incentive Scheme. Calix's safety management system operates across the Company globally. Additionally, Calix's Safety Management system is independently accredited under ISO 45001, the International Standard for Work Health and Safety Systems in Victoria and Queensland. Calix employees complete safety training, which is reinforced and supported by frequent, ongoing safety initiatives. All injuries, incidents and serious near misses are thoroughly investigated and reported to the Board to help prevent reoccurrence and ensure continual improvement to Calix's safety management system.
Community acceptance of Carbon Capture, Use and Storage	Community and public acceptance help to ensure each site at which Calix's technology is deployed has a social licence to operate. Historically, Carbon Capture, Use and Storage (CCUS) projects have had challenges with public acceptance, complicated by the variety of types of CCUS proposed, their cost and technical viability, and the perception that CCUS was being deployed to prolong the use of fossil fuels. These concerns have led to some scepticism and cynicism in public attitudes towards CCUS that could delay or prevent the implementation of Calix and its subsidiaries' plans, leading to adverse financial impacts.	Calix and its subsidiaries develop community benefits plans to support new projects, which include detailed stakeholder analysis and proactive and targeted public engagement campaigns to improve public understanding and acceptance. Tactics include establishment of visitor centres, dedicated and multi-lingual project webpages, educational materials, video and social media content, and local partnerships. Furthermore, Calix's project delivery model utilises technology licensing, with implementation by local firms using local resources. This augments the project's benefits by creating socio-economic benefits for local communities, in addition to the environmental and health benefits enabled by the technology.

Internal audit

Calix has adopted internal control procedures in accordance with the Company's *Risk Management Policy*. Calix's internal controls include clear and approved authorisation limits for all expenditure and payments, a dual-approval process for all payments, and cash flow forecasts with materiality thresholds that are regularly reviewed, in addition to reviews of its other financial materiality thresholds.

The Board, with support from the ARMC and senior management, is charged with evaluating and considering improvements to Calix's risk management and internal control processes on an ongoing basis. Additionally, internal audits are performed to ensure compliance with safety and quality certification requirements.

Assurances by management

The Board received declarations from the Managing Director & Chief Executive Officer and Chief Financial Officer during the reporting period in accordance with section 295A of the Corporations Act and Recommendation 4.2 of the ASX Principles and Recommendations.

COMMUNICATION WITH SHAREHOLDERS

Calix is committed to regularly communicating with its shareholders in a timely, accessible and clear manner.

Shareholder engagement

Shareholders and other stakeholders are informed of all material matters affecting the Company through Australian Securities Exchange (ASX) announcements, periodic communications, and a range of other forums and publications, including a shareholder newsletter.

Shareholders can email Calix using an inbox dedicated to investor enquiries: investorrelations@calix.global. This service provides an ongoing opportunity for shareholders to ask questions of the Company.

The investor centre, which is accessible via the Company's website, contains a comprehensive set of relevant corporate information for shareholders, such as the Company Constitution, [Board Charter](#), committee charters, [Code of Conduct](#), and company policies.

Copies of material announcements and presentations are released on the ASX market announcements platform before being added to the Company's [investor centre](#) and emailed directly to shareholders. Complete sets of information, including recordings when available, prepared for the Company's Annual General Meeting (AGM), and its full year and half year financial results presentations are also available from its [investor centre](#).

The Company's Annual Report to shareholders provides shareholders with an understanding of the Company's activities, performance and position for the previous financial year. Alongside its Annual Report, the Company publishes an annual Sustainability Report and Corporate Governance Statement. Shareholders can elect to receive electronic or hard copies of the reports. They are also available from the Company's [investor centre](#).

The Board encourages all shareholders to attend and participate in the Company's AGM. To increase attendance, shareholders have the option of attending in-person or online. Voting on all resolutions put to the AGM is conducted by a poll. Shareholders are invited to ask questions before and during the meeting. The Company's external auditor attends the meeting to answer questions from shareholders about the conduct of the audit and preparation of the auditor's report.

Receiving shareholder communications via email is the best way to stay informed about Calix's activities. Shareholders can update their preference and contact information via the Calix share registry managed by [Boardroom](#).

Calix's [Shareholder Communications Policy](#) is available on the Company's website in its [investor centre](#).

Continuous disclosure

As a company listed on the ASX, Calix is required to disclose certain information to the market, to ensure investors are properly informed about the Company.

In compliance with the ASX Listing Rules, it is the Company's practice to immediately disclose information about Calix if a reasonable person would expect that information to have a material effect on the price or value of Calix's securities unless the materially price sensitive information falls within one of the exemptions set out in ASX Listing Rules or other applicable regulatory requirements. Calix has established processes to enable the Company to provide shareholders and the market generally, with timely, direct and equal access to relevant information. The Board receives copies of all announcements under Listing Rule 3.1.

Calix's [Continuous Disclosure Policy](#) is available on the Company's website in its [investor centre](#).

Corporate reporting

Calix has internal verification and approval processes to support the integrity of the information being disclosed in ASX announcements, including periodic corporate reports that are released to the market. The specific verification and approval process varies depending on the particular release.

Compliance with corporate governance standards

Calix supports the intent of the fourth edition of the Australian Securities Exchange (ASX) Corporate Governance Principles and Recommendations (Principles and Recommendations).

Calix's compliance with the ASX Principles and Recommendations is outlined within ASX Appendix 4G. Calix's current ASX Appendix 4G has been lodged with the ASX.

This Corporate Governance Statement is part of Calix's 2024 Financial Year reporting suite, which also includes the Calix Limited Annual Report 2024 and Calix Limited Sustainability Report 2024.

Calix's charters, policy documents, Calix Limited Annual Report 2024, Calix Limited Sustainability Report 2024, and its current ASX Appendix 4G are available in the [investor centre](#) on the Company's website.

CONTACT INFORMATION

DISCLAIMER

This Report has been prepared by Calix Limited (ABN 36 117 372 540) ("Company").

Summary information

This Report contains summary information about the Company and its subsidiaries ("Calix") and their activities current as at 27 August 2024. The information in this report is a general background and does not purport to be complete.

Future Performance

This Report contains certain "forward-looking statements". The words "expect", "future", "anticipate", "estimate", "intend", "believe", "guidance", "should", "could", "may", "will", "predict", "plan" and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. Forward-looking statements, opinions and estimates provided in this report are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward-looking statements, including projections, guidance on future earnings and estimates are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Such forward-looking statements are by their nature subject to significant uncertainties and contingencies and are based on a number of estimates and assumptions that are subject to change (and in many cases are outside the control of Calix and its directors) which may cause the actual results or performance of Calix to be materially different from any future results or performance expressed or implied by such forward-looking statements. The forward-looking statements should not be relied on as an indication of future value or for any other purpose. No representation, warranty or assurance (express or implied) is given or made in relation to any forward-looking statement by any person (including the Company). In particular, no representation, warranty or assurance (express or implied) is given that the occurrence of the events expressed or implied in any forward-looking statements in this report will actually occur. Actual results, performance or achievement may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. The forward-looking statements in this report speak only as of the date of this report. Subject to any continuing obligations under applicable law, the Company disclaims any obligation or undertaking to provide any updates or revisions to any forward-looking statements in this report to reflect any change in expectations in relation to any forward-looking statements or any change in events, conditions or circumstances on which any such statement is based. Nothing in this report will under any circumstances create an implication that there has been no change in the affairs of Calix since the date of this report.
